PITIPOL TANGCHERDCHAR

EDUCATION

Kasetsart University – 3rd year

Bachelor of Science – Computer Science GPAX: 3.21/4.00

Relevant coursework: Software Construction, Database Systems, Machine Learning, Parallel Computing with CUDA, Computer Animation and Ray Tracing

SKILLS

- Python
- Java
- C
- C++
- Blender

LANGUAGES

- Thai (native)
- English (proficient)

PROJECTS

Locker Management System Team project · Software Construction course

- Built a JavaFX/Maven desktop application for managing university locker rentals across admin, staff, and customer roles, with JSON file-based storage
- Refactored the locker and padlock class hierarchy after a system redesign, adding default-image handling and availability tracking for key-to-locker matching
- Added locker service discontinuation and usage-history tracking, plus a forced password-change flow for new staff accounts
- Fixed petition approval logic, including scoping visible petitions to service point, matching available keys, and resolving a digital-locker approval bug

Ray Tracing Renderer — Black Hole Visualization

- Extended a course-provided object-oriented ray tracer (Python) with a custom accretion-disk/ring rendering system to visualize a black hole scene
- Independent extension of a skeleton framework issued as part of a Ray Tracing course assignment

Short Animated Film — Character Rigging & Lip-Sync Team project · Computer Animation course

- Rigged the lead character and built shape keys driving lip-sync animation for a team-produced short film
